

Children's Hospital of Wisconsin

About us

internationalwi.org

Children's Hospital of Wisconsin is recognized as one of the leading pediatric health care centers in the United States and has been caring for kids in Wisconsin and across the nation since 1894. As a Level I Pediatric Trauma Center, we care for kids with all types of illnesses, injuries, birth defects and other disorders. We are one of the busiest children's hospitals in the country and admit more than 23,000 children and perform more than 14,500 surgeries each year. Our nursing staff has earned the Magnet Recognition Award®, given to health care organizations that demonstrate excellence in nursing. We believe kids deserve the best and promise all of our families that they'll always know their children are in the very best hands.
