

Children's Hospital of Wisconsin Gastroenterology

internationalwi.org

Manu R. Sood, MD, is medical director of Gastroenterology at Children's Hospital of Wisconsin and professor and chief of Pediatric Gastroenterology at the Medical College of Wisconsin.

Dr. Sood also is program director of the Center for Pediatric Neurogastroenterology, Motility and Autonomic Disorders, which is one of the few centers in the United States that treats children with functional abdominal bowel disorders. He is a board-certified pediatric gastroenterologist and recognized for his clinical expertise in gastroesophageal reflux, motility, irritable bowel syndrome and Hirschsprung's disease. Dr. Sood is listed as one the 2014 Best Doctors® in America.

Praveen S. Goday, MD, is program director of Nutrition at Children's Hospital and associate professor of Pediatric Gastroenterology at the Medical College of Wisconsin. Listed as one the 2014 Best Doctors® in America,

Dr. Goday is a board-certified pediatric gastroenterologist and a leading authority on managing nutritional programs for children with short bowel syndrome, a failure-to-thrive diagnosis, feeding difficulties and nutritional problems related to cystic fibrosis. Dr. Goday's extensive research covers a complete gamut of nutritional disorders.

The **Gastroenterology, Hepatology and Nutrition Center** at Children's Hospital of Wisconsin is recognized internationally for diagnosing and treating children of all ages with a wide variety of digestive tract and liver disorders, ranging from common problems to rare and complex disorders. Our comprehensive, family-centered approach focuses on treating the whole child and forming partnerships with family members to keep them informed and involved in their child's care every step of the way.

Center for Pediatric Neurogastroenterology, Motility and Autonomic Disorders

Our experts diagnose and treat children with a variety of functional gastrointestinal disorders, including chronic abdominal pain, motility, autonomic disorders and cyclic vomiting syndrome. The center has one of the few state-of-the-art pediatric autonomic laboratories in the country to help diagnose children with autonomic disorders.

Our experts create individual treatment plans for each child and coordinate care with other specialties as needed.

Our center offers the most advanced diagnostic motility and autonomic testing, including:

- Anorectal, antroduodenal, esophageal and colonic manometry studies

- Autonomic testing (deep breathing, tilt table test, sudomotor axon reflex and Valsalva maneuver)
- Colonoscopy
- Capsule endoscopy
- Endoscopy
